

Rahul Sengupta

408-709-9428 | rasengupta@ucsd.edu | [linkedin.com/in/rahul-sg](https://www.linkedin.com/in/rahul-sg)

EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Science in Data Science, Minor in Finance — GPA: 3.586 / 4.0

2022 - 2026

- **Awards:** Provost Honors

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Scikit-Learn), R, Java, C++, JavaScript

ML & AI: PyTorch, TensorFlow, XGBoost, Random Forest, Logistic/Ridge Regression, Time Series Forecasting, LLM Fine-tuning, Prompt Engineering, Vector Embeddings, NLP, LLM Evaluation, RAG Systems, LangChain

Cloud, Infra, & Databases: AWS (EC2, S3, Lambda, RDS, SageMaker, RDS/Aurora), DigitalOcean, Spark, SQL, PostgreSQL

Frameworks & Tools: REST APIs, Docker, Flask, React/Node.js, GitHub, PowerBI, Tableau, Figma, Advanced Excel

EXPERIENCE

Finance & Data Science Intern

Jun. 2025 – Present

Eurofins USA

San Diego, CA (Remote)

- Developed quarterly revenue forecasting models using Random Forest and XGBoost across 45+ business units, achieving RMSE of 0.72 against a baseline RMSE of 0.94
- Built 5+ real-time Power BI dashboards tracking operational KPIs adopted by upper management for quarterly sales planning and strategic decision-making

AI Research & Evaluation Engineer

Sep. 2025 – Mar. 2026

Honda Research Labs & 99P Labs

San Diego, CA (Hybrid)

- Led evaluation strategy research for next-generation enterprise AI systems, driving end-to-end framework design
- Designed scalable LLM evaluation framework assessing 5 dimensions using LLM-as-judge with human validation, achieving 0.96 average score and 4.7/5 human agreement – outperforming ROUGE and BLEU baselines
- Engineered trend-aware stopping controller with domain-aware rubric judging and hybrid scoring across 7 cross-domain lecture datasets; built interactive Streamlit dashboard for evaluation diagnostics
- GitHub: <https://tinyurl.com/honda-ucsd-capstone>

AI Developer Intern

Sep. 2023 – Sep. 2024

CitMit AI (Backed by UC Berkeley Haas & UCSD/BlackStone Launchpad)

San Diego, CA

- Built AI compliance system using GPT-4, fine-tuning, prompt engineering, and vector embeddings for document regulatory verification, reducing estimated plan-checking time by ~ 50%
- Architected end-to-end AI pipeline for PDF processing (chunking, embedding, and similarity search); deployed on DigitalOcean with Supabase integration
- Designed 10+ user-facing web pages with Figma & React.js featuring multi-step form workflows, file uploads, and interactive data visualizations. UI/UX Design: <https://tinyurl.com/citmit-figma>

PROJECTS & RESEARCH

PicksIQ - Founding Member | Full-Stack, Data Engineering, Predictive Modeling, React

Jun. 2025 – Present

- Built full-stack sports analytics platform using XGBoost models to generate real-time player prop predictions and expected value calculations for sports betting insights
- Engineered automated data pipelines connecting to SportsGameOdds API to process live odds and player statistics
- Launched platform reaching 1,000+ users; built interactive React dashboards visualizing win probabilities and performance trends
- GitHub: <https://tinyurl.com/picksiq-github>

CERTIFICATIONS

BIDA: Business Analytics & Data Analytics Certification

Completed - Aug 2024

AWS Solutions Architect: Associate Level Certification

Expected Completion - Jun 2026
